Aptitude Solutions County Recording and Indexing Solutions Provider **Approved by the State of North Carolina**

OnCore Solution Verified to Meet Software Compliance with Minimum Indexing Standards

Maitland, Fla. – (January 2009) – Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry, today announced that its Aptitude Solutions division has been approved by the State of North Carolina as being compliant with Recording and Indexing software standards for county Register of Deeds government offices in North Carolina.

OnCore, Aptitude Solutions' industry-leading recording solution for county governments of all sizes, enables counties to reduce internal paperwork and easily manage workflow by moving document images along in the process electronically, rather than via paper.

"The State of North Carolina is fortunate to have LPS' Aptitude Solutions software approved as being compliant with the state indexing standards. In recognition of OnCore technology's proven ability to increase efficiency, reduce waste and help county governments to better serve North Carolina property owners with faster, more accurate processing of their land records," said Register of Deeds and NCARD President Rebecca Cipriani.

OnCore's flexible capabilities are easily scalable to any size government department to meet its unique business needs. OnCore features that can help local and state governments reduce costs and increase processing speed include electronic recording, automatic document queuing, electronic digital stamping, historic image back posting and full accounting functionality.

In addition, OnCore uses Optical Character Recognition technology in its indexing and redaction tools, so county recorders and registers can automatically index their documents without human intervention. OnCore's innovative system capabilities also enable users to remain compliant with legislative mandates on privacy by removing sensitive information, such as Social Security numbers, from county recorders' public image library.

"We're proud to have met the State of North Carolina's stringent standards for accurate and timely indexing of property records," said Paul Miller, president, LPS' Aptitude Solutions Division. "OnCore's powerful technology will continue to help county governments eliminate mountainous paper trails, more easily manage increased workloads and provide better services to constituents through the industry's leading solution for automation and electronic processing of property records."

Aptitude Solutions is headquartered in Maitland, Florida. For more information about Aptitude Solutions, call 866.278.4765 or visit www.apititudesolutions.com.
