Aptitude Solutions Selected to Implement Nevada's Largest County Land Records System

OnCore® Solution Chosen for Industry-Leading Flexibility and Scalability

JACKSONVILLE, Fla. – (January 2009) – Aptitude Solutions, a division of Lender Processing Services, Inc. (NYSE: LPS), was selected by Clark County, Nevada, to provide software and related services to help further automate and streamline the efficiency of its county land records system. Aptitude Solutions was chosen over 5 other leading software providers after a rigorous RFP process that lasted more than six months.

Clark County, the 15th most populous county in the United States, will implement Aptitude Solutions' OnCore® software, the industry-leading property recording solution for county governments. OnCore's unique up-front scanning technology enables counties to reduce internal paper flow and easily manage recording workloads by moving images electronically, instead of pushing paper.

"Clark County processes thousands of land records daily, so OnCore's ability to manage volume of this scale and its nimbleness in accommodating changing regulations were key factors in selecting this solution," said Debbie Conway, County Recorder for Clark County, Nevada. "Most importantly, we believe OnCore will be a powerful, cost-effective tool to provide our two million constituents better service through faster and more efficient processing of their land records."

OnCore features the industry's most flexible and scalable land record management solution through its tremendous automation capabilities and more than 500 flex settings. Its seamless integration with electronic recordings, automated indexing, redaction capabilities and other county agency systems gives counties the ability to meet today's demands for timely, accurate property recordings. With OnCore's Optical Character Recognition (OCR) technology, county recorders are able to automatically index documents without human intervention. OnCore also helps county recorders remain in compliance with legislative mandates concerning consumer privacy by removing sensitive information, such as Social Security numbers, from their public image libraries.

"OnCore is an ideal solution to strengthen record-keeping resources that are stretched as the result of Clark County's enormous population growth," said Paul Miller, president, LPS' Aptitude Solutions division. "We're proud that Aptitude Solutions was selected to support Clark County's strong commitment to finding progressive solutions that will reduce governmental costs and streamline workflow efficiencies by minimizing paper touch points."

Aptitude Solutions is headquartered in Maitland, Florida. For more information about Aptitude Solutions, call 866.278.4765 or visit www.aptitudesolutions.com.
