Arapahoe County, Colorado, Implements Aptitude Solutions' Software Suite, including the OnCore Recording Platform, For Greater Efficiency and Records Access

LPS' OnCore[®] Solution Effectively Supports High-Volume Property Recordings

JACKSONVILLE, Fla. (February 22, 2010) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has implemented land records recording software in Colorado's Arapahoe County, providing a powerful software solution that further automates and streamlines land recording and indexing for the county Clerk and Recorder.

In addition to implementing the OnCore system for Colorado Clerk and Recorders, Arapahoe County simultaneously deployed electronic recording, automated indexing, automated redaction and new internet services from Aptitude Solutions. Within the first day of use on the new system, the Clerk and Recorder's office recorded over 50 percent of their documents electronically through OnCore's built-in eRecord functionality. Automated indexing uses Optical Character Recognition (OCR) technology to capture index data directly from scanned documents and seamlessly inputs the pertinent field information into OnCore. Sensitive data such as Social Security numbers and driver's license numbers are automatically removed from the public record using OnCore's fully integrated auto-redact software.

"The team of trainers, programmers and support staff dedicated every effort necessary to ensure our project was a complete success," said Arapahoe County Clerk and Recorder Nancy Doty. "Our staff members instantly grasped the intuitive workflow and feature set in the software, and the public now has extended services available to them through eRecording, eCommerce and internet kiosk tools."

The new internet services include OnCore's Web search with eCommerce functionalities that allow the public to purchase document copies online. The public also now has access to

OnCore's marriage Web kiosk, enabling users to submit marriage application information online in order to expedite the transactional service time once they arrive in the office. Automated merge functions generate the necessary forms within the system, eliminating redundant data entry. The platform's flexibility and wide-ranging capabilities are easily scalable to meet the unique business needs of any size county government.

Paul Miller, president of LPS' Aptitude Solutions, said, "The OnCore System, along with Aptitude Solutions' suite of complementary products, deployed with great success this week in Arapahoe County, Colorado. Clerk and Recorder Nancy Doty and her expert staff worked hand-in-hand with Aptitude Solutions' project management team, bringing energy, enthusiasm, and attention to detail throughout the project."

About LPS Aptitude Solutions

LPS Aptitude Solutions is a division of Lender Processing Services, Inc., a leading provider of integrated mortgage, real estate and government technology and services. LPS Aptitude Solutions is the leading provider of innovative technology solutions for county governments. Our end-to-end suite of software products automates workflow processes and increases efficiency. Software solutions include ShowCase's comprehensive court case management solution, OnCore's land records recording system, Tribute's tax deed filing system, automated indexing and redaction optical character recognition (OCR) tools, Web search engines, and more.
