Baker County, Florida Clerk of Court Live with Automated Indexing and Automated Redaction

Maitland, Florida -- (August 1, 2007) -- Aptitude Solutions, a division of Fortune 500 company Fidelity National Information Services, Inc. (NYSE:FNF) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case management systems, today announced the implementation of aiINDEX automated indexing technology and aiREDACT automated redaction technology at Baker County, Florida Clerk of the Circuit Courts Office.

Baker County Florida Clerk of Circuit Courts office has taken advantage of the aiINDEX technology, which is fully integrated with the OnCore Recording System. OnCore utilizes up-front scan technology that completely digitizes the official record indexing and recording process, thus reducing internal paper flow and expediting the document recording process. These added solutions enhance automation in the overall recording process, thus increasing accuracy and accessibility of the data.

In addition to aiINDEX, the Baker County Clerk's office has also implemented aiREDACT to handle redaction of sensitive information on a go-forward basis. Like aiINDEX, aiREDACT also integrates into the OnCore workflow automatically locating redaction candidates which are then placed in a review queue. aiREDACT is compliant with State requirements for the protection of sensitive personal information including social security numbers, bank account numbers, credit and debit account numbers, and more.

According to Recording Director Bonnie Palleschi, "As the only person working in recording, any improvement in efficiency makes a huge impact. aiINDEX and aiREDACT have reduced my workload considerably."

As recording volumes grow, OnCore's aiINDEX will help Baker County maintain their quality of service and quick recording turnaround as they move into the future.

President, Paul Miller explains, "We are very excited, that Baker County continues to be committed to the latest technology. The efficiencies gained by Baker County are evidence of the product's strength in the recording environment."
