Broward County, Florida, Implements Aptitude Solutions' Automated Indexing Optical Character Recognition Technology with OnCore

LPS' OnCore[®] Solution Effectively Supports High-Volume Property Recordings

JACKSONVILLE, Fla. (January 25, 2010) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has implemented automated indexing with Optical Character Recognition (OCR) software in Florida's Broward County Recording Office, providing a powerful technology solution that further automates and streamlines land recording and indexing for the County Recorder.

The Recorder's office has taken advantage of Aptitude Solutions' Auto-Index technology, which is fully integrated with Aptitude Solutions' OnCore Recording System. OnCore utilizes up-front scan technology that completely digitizes the official record indexing and recording processes, thus reducing internal paper flow and expediting the document recording process. These added solutions enhance automation in the overall recording process, thus increasing accuracy and accessibility of the data.

"The implementation of Aptitude's Auto-Index OCR Technology represents our continuing commitment to contain costs and improve efficiencies in capturing data for the immediate search-and-retrieve needs that our customer base wants. In conjunction with the OnCore Recording system, Auto-Index will provide us with the ability to maintain service levels, despite staff down-sizing," said Sue Baldwin, Broward County Director of Records, Taxes and Treasury.

OnCore creates an image-centric workflow environment and further facilitates electronic recording, automatic document queuing, electronic digital stamping, instant public access queries and more. In production since 2002 and serving almost two million property owners in Broward County alone, OnCore can enhance and streamline production for Recorder offices of all volumes. Broward County was the first of more than 60 counties in the country to implement

Aptitude Solutions' OnCore platform for electronic land records indexing and eRecording.

LPS Aptitude Solutions President Paul Miller said, "The Broward County Recording Office has been a longtime customer of Aptitude Solutions with the use of the OnCore Recording System. The expanded implementation of Aptitude's product suite serves to further increase efficiency and reduce overhead costs through Aptitude's integrated systems."

About LPS Aptitude Solutions

LPS Aptitude Solutions is a division of Lender Processing Services, Inc., a leading provider of integrated mortgage, real estate and government technology and services. LPS Aptitude Solutions is the leading provider of innovative technology solutions for county governments. Our end-to-end suite of software products automates workflow processes and increases efficiency. Software solutions include ShowCase's comprehensive court case management solution, OnCore's land records recording system, Tribute's tax deed filing system, automated indexing and redaction optical character recognition (OCR) tools, Web search engines and more.
