Broward County Florida Recording Office to Implement Aptitude Solutions' Automated Indexing

Maitland, Florida -- (May 2009) -- Aptitude Solutions, a division of Lender Processing Services, Inc. (LPS) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case management systems, today announced the contract signing for automated indexing software with Broward County, Florida's Recording office.

Broward County Recording plans to take advantage of automated indexing technology, which is fully integrated with the OnCore Recording System. Automated indexing software uses Optical Character Recognition (OCR) to identify target text within land record documents in order to automate the indexing process.

The software captures key information such as grantor, grantee, legal description, and case number, and directly indexes this information into the OnCore recording system. OnCore utilizes up-front scan technology that completely digitizes the official record indexing and recording process, thus reducing internal paper flow and expediting the document recording process. These added solutions enhance automation in the overall recording process, thus streamlining the indexing step and expediting accessibility of the data.

Sue Baldwin, Director of Records, Taxes, and Treasury, comments, "Implementing Aptitude's Automated Indexing software represents our continued commitment to incorporate solutions that make our office more efficient and effective. By reducing staff workloads and streamlining the department workflow, we save both time and dollars."

With automated indexing added to the OnCore system, Broward County Recording will be able to automatically index the real estate deed information through OCR, without manual intervention.

President, Paul Miller explains, "We are committed to providing software and services to one of the most populous counties in the country, Broward County, Florida. Our work with the Recording Office will further enhance their quality of service while creating greater efficiencies to streamline production efforts and minimize staff workloads."
