### **Lender Processing Services' Aptitude Solutions Announces OnCore Software Implementation in Largest County in Nevada**

JACKSONVILLE, Fla. – (August 3, 2009) – Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that the Clark County, Nevada Recorder's Office is now live in production with its Aptitude Solutions division's OnCore Recording System.

As the largest county in Nevada, Clark County carries almost three-fourths of the state's population, and is also one of the largest of all counties in the country. Aptitude Solutions spent the past several months working directly with Recorder Debbie Conway and her team of experts in the Recorder's office to prepare and deliver a successful OnCore Recording System implementation.

"The transition to Aptitude Solutions was a smooth and well organized effort. The level of customer service and the professionalism exemplified by their staff exceeded our expectations," stated Recorder Debbie Conway. "The implementation of this software system has allowed our office the ability to offer a new set of services to our constituents through expanded search tools and instant document return. For us this represents another step towards becoming a model Recorder's Office."

From conversion to workflow design, Aptitude Solutions worked hand-in-hand with county staff to install and train on the software's unique and robust feature set. Prior to go live, parallel testing took place to review conversion of legacy records into the OnCore system and prepare the staff for a production environment. On August 3, 2009, the final implementation was delivered and the Clark County Recording staff processed over 3,500 documents for recording in Aptitude Solution's OnCore System on the first day of production. The system's flexible design and open architecture also enabled electronic recording to take place immediately on day-one of OnCore's live installation.

## **Lender Processing Services' Aptitude Solutions Announces OnCore Implementation in Clark County, Nevada Recorder's Office**

### **Page 2**

“We’re pleased to have completed a successful software installation in one of the largest counties in the country,” said Paul Miller, President of Aptitude Solutions. “Recorder Debbie Conway, her project management team and front-line staff embraced Aptitude Solutions and the OnCore product with enthusiasm and a level of industry expertise that made the implementation a tremendous success. The Recorder’s use of the OnCore solution is already bringing increased productivity and efficiency and improved data quality and consistency to Clark County and will only continue to improve through even more expanded use of the OnCore solution.”

Clark County Recorder’s Office can now perform instant recording using OnCore’s scan-first technology, providing immediate return of the original document to walk-in customers. The system’s Optical Character Recognition (OCR) technology includes automated redaction of personal information and automated indexing for faster indexing of document data. Searchers can now access an expanded search query for instant retrieval of recorded document data and images.

### **About LPS Aptitude Solutions**

LPS Aptitude Solutions is a division of Lender Processing Services, Inc., a leading provider of integrated mortgage, real estate and government technology and services. LPS Aptitude Solutions is the leading provider of innovative technology solutions for county governments.
