Collier County, Florida Clerk of Court Selects Aptitude Solutions Showcase Court System

Maitland, Florida -- (October 18, 2007) -- Aptitude Solutions, a division of Fortune 500 company Fidelity National Information Services, Inc. (NYSE:FIS) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management system, Tribute tax deed filing system, DMS document management system and ShowCase court case management system, today announced the contract signing of ShowCase with Collier County Clerk of the Circuit Court.

Aptitude Solutions' contract with Collier County, Florida represents the 2nd county in Florida to select ShowCase as their integrated court case management solution. After an extensive analysis of several vendor applications, Collier County selected ShowCase for all of their court needs including Traffic, Misdemeanor, Felony, Juvenile, Civil, Probate, Appeals, Probate, Mental Health, and Family Law. Collier County identified three primary options for solving their court case management system needs. The first option was to select an off-the-shelf system. This was the least favored approach as it would not allow the Clerk's office to respond immediately to judiciary and public needs. The second option was to develop an in-house solution. This option would allow for the greatest amount of flexibility but would place a large burden on the County's IT and Court staff. The preferred option was to partner with a vendor that would offer a hybrid solution which would allow for an off-the-shelf system with the flexibility of a custom in-house solution. Aptitude Solutions offered a unique hybrid approach that provides the County the benefits of a an off-the-shelf solution and the nimbleness and flexibility required to respond very quickly to new court requirements. The ShowCase solution will also enable other ShowCase customers to share in the open nature of this hybrid approach and to take advantage of add-on solutions developed by the Collier Clerk's IT Staff.

Aptitude Solutions President, Paul Miller, comments; "Collier presented us with a unique opportunity to not only help solve Collier County's court case management needs with our state-of-the-art ShowCase product but to also do so in a way that maximizes the County's nimbleness in responding to the ever-changing demands that are present every day in conducting the court's business. This is strikingly different from past solutions and has the potential to really separate Showcase from other offerings currently in the marketplace by giving County Clerks a rich and robust product immediately and the flexibility to quickly respond to changes. We are excited to have the opportunity to work with Collier and to take advantage of the shared passion they bring to Court development. Their IT Staff and Court Directors have unique ideas which will certainly add to the already robust Showcase system."

Collier was also seeking a system that was current with the industry and technology standards. The system requirements were for a stable, predictable platform that would remain current and supportable for many years. Aptitude's use of Microsoft's .NET technologies and other readily available development toolkits will allow Collier to leverage current expertise in the job market and allow them the flexibility they need in developing their own add-ons to the system. ShowCase is integrated with both state and local agencies including TCATS, SRS, CJIS, the local Sheriff's office and provides reporting required to support Florida's Title V requirements.

Collier's process for selecting a technology partner included directly contacting over 20 Florida counties. Vendors were evaluated on product features and functionality, technology, service and support, pricing, long-term vision and value, and the ability to deliver.
