

ANNOUNCEMENT

Dauphin County, Pennsylvania Implements Aptitude Solutions Automated Redaction Software for Protecting Sensitive Information in Public Records

LPS' OnCore[®] Solution Effectively Supports High-Volume Property Recordings and Redaction

JACKSONVILLE, Fla. (January 4, 2010) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has implemented Auto-Redaction (OCR) software in the Dauphin County, Pennsylvania Recorder's Office.

Aptitude Solutions' Auto-Redaction software effectively enables county governments to follow the spirit of the privacy laws by providing the ability to identify and redact a variety of personal information (Social Security numbers, birth dates, driver's license numbers, etc.). Public constituents now have the ability to search for information that needs to be accessible by law, while personal information is kept secure. Auto-Redact uses Optical Character Recognition (OCR) technology and literally reads every page of each scanned image, identifies all regions that contain sensitive information, and electronically highlights that information on the image for quality assurance and redaction. Auto-Redact also supports multiple redaction environments, meaning that a county can simultaneously process images on go-forward and historical bases.

Aptitude Solutions President Paul Miller commented, "Dauphin County's partnership with Aptitude Solutions began several years ago with Recorder Jim Zugay's implementation of the OnCore Recording System. We are committed to continuing our partnership through Mr. Zugay's efforts to manage the county's public records with Aptitude's Redaction services and licensed software."

Aptitude Solutions' OnCore Recording System is seamlessly integrated with the Auto-Redact software. For the Dauphin County, Pennsylvania Recorder's project, Aptitude Solutions will perform turn-key services to process approximately six million images for redaction in the historical library vault. Simultaneously, Aptitude Solutions' redaction software operates in Mr. Zugay's office for immediate redaction of current day-forward recorded documents. Full integration with the OnCore system offers an automated method to record, redact, and securely manage the public record.

Dauphin County, Pennsylvania Recorder Jim Zugay announced, "After Aptitude Solutions installed a state-of-the-art recording system, it only made sense for the Recorder's Office to extend the project to include redaction software and services. Our redaction project effectively enables us to securely redact personal information from public view in our six million historical library image vault as well as day-forward recordings. With Aptitude Solutions' software, the Recorder's office can provide public record information, while

protecting secure details from public view.”

Aptitude Solutions’ sole focus on government software technology enables its staff to provide the very best in conversion services, software implementation, project management, and customer service. Aptitude Solutions’ team of experts are trained and experienced and offer an exceptional level of commitment to service that cannot be beat by any competitor in the market today.
