Douglas County, Colorado Clerk and Recorder Selects Aptitude Solutions for Recording and Indexing Platform

OnCore® Solution Chosen to Handle High-Volume Property Recordings

Maitland, Fla. – (January 2009) – Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry, today announced that its Aptitude Solutions division signed contracts with Douglas County, Colorado’s Clerk and Recorder, to provide a powerful software solution to further automate and streamline land recording and indexing.

OnCore, Aptitude Solutions’ industry-leading recording and indexing platform, enables county governments of all sizes to reduce internal paperwork and easily manage workflow by digitizing documents, then routing and indexing document images electronically, rather than through traditional, paper-driven processes. OnCore’s features include electronic recording, automatic document queuing, electronic digital stamping, historic image back posting, full accounting functionality and more. The platform’s flexible and wide-ranging capabilities enable it to easily scale to meet the unique business needs of any county government, no matter what size.

After completing an in-depth Request for Proposal (RFP) process, Douglas County, Colorado will become the eleventh county in Colorado to implement Aptitude Solutions’ OnCore platform for electronic land records indexing and eRecording.

“After reviewing several systems, Douglas County selected Aptitude Solutions’ OnCore platform as the best system to fulfill our business requirements for recording,” said Douglas County Clerk and Recorder Jack Arrowsmith. “With this solution, we will be able to handle high-volume recording, increase automation and provide detailed audit checks.”

The Clerk and Recorder’s office also plans to implement OnCore’s Optical Character Recognition (OCR) technology to automatically index documents as they are recorded. In addition, Douglas County has also contracted to use the same OCR technology to capture redaction candidates as documents are recorded. OnCore’s innovative system capabilities enable users to take advantage of over 500 flex settings to conduct a workflow that meets ever changing business demands.

Paul Miller, president of LPS’ Aptitude Solutions, stated, “We’re looking forward to working with the Douglas County staff to implement OnCore technology to increase efficiency, reduce paperwork and better serve the public.”
