

# Press Release

## Duval County Clerk of Court Go Live with ShowCase Civil Departments on Schedule

**Maitland, Florida -- (March 31, 2008) --** Aptitude Solutions, a division of Fortune 500 company Fidelity National Information Services, Inc. (NYSE:FIS) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and Showcase court case management systems, today announced the implementation of Showcase Court Case Management System in Duval's Civil departments. The implementation of Civil completes the implementation of Showcase in all departments of the Duval Clerk of Courts office.

In May 2005, Duval County Clerk of Courts contracted with Aptitude to develop a new court case management system. After going live with the first modules of ShowCase in the summer of 2007, Duval County went live with the final module, covering all Civil departments, over this past weekend. This represents the final major milestone of functionality to be delivered and enables Duval County to be fully operational on ShowCase. The legacy system, which Showcase was designed to replace, will be brought offline tomorrow as a result of this implementation.

This accomplishment is the direct result of over 3 years of perseverance and teamwork between Aptitude Solutions and Duval County. The County is very excited about the changes that ShowCase has brought them. In addition to the money saved from decommissioning the legacy system, the county has experienced simplified workflow, improved data accuracy, improved transparency of data, and continues to uncover vestiges of processes no longer relevant or necessary. ShowCase has shown a bright light on a most critical Clerk function and has demonstrated its value clearly and quickly.

Showcase has been designed to offer the latest tools in imaging, workflow, electronic recording, secure internet access to court records and integrated data transfer between the State Attorney's office, Jacksonville Sheriff's office and other state and local agencies. The intuitive user interface and a flexible management system allows users to quickly enter case information and aids in cross training employees. The flexible management tools allow the County to be flexible and quickly modify system settings to guarantee adherence to the ever changing nature and requirements placed upon the Clerk's court and information technology staff. The Showcase Court Case Management System includes modules for Traffic, Misdemeanor, Felony, Juvenile, Family Law, Circuit Civil, County Civil, Mental Health, Domestic Violence, and Appeals.

One of the major goals for Duval County during the development of ShowCase, was to provide in-court processing for the Judges and Clerks staff to eliminate a large amount of post court processing the Clerks offices typically do. In addition to in court processing, the system is integrated with numerous local and statewide agencies which eliminates redundant data entry. For example, Showcase communicates through a broker server with the Jacksonville Sheriff's office. When Misdemeanor and Felony cases are entered the user will enter a couple of key pieces of data which will then pull all of the arrest and booking information including the charges.

*President Paul Miller explains, "The final implementation of Civil in the Duval Clerk's office represents a major milestone and a huge accomplishment. Both of our teams have worked long and hard to make this project a success. To that end, I look forward to our continued partnership with Duval and the additional opportunities which will open up based on the completion of this complex system."*
