

Press Release

Erie County Ohio Recorder's Office to Implement Aptitude Solutions OnCore Recording System

Maitland, Florida -- (January 2009) -- Aptitude Solutions, a leading provider of innovative technology solutions for county government, today announced that the Erie County, Ohio Recorder's Office will implement Aptitude Solutions OnCore Recording system.

After an in-depth RFP (Request for Proposals) process, Erie County will become the 3rd County in the state of Ohio to implement Aptitude Solutions' OnCore recording platform, a system used by county government in over 60 counties across 13 states for electronic land records indexing and eRecording. With OnCore's unique workflow capabilities, the Erie County Recorder's office will be able to offer immediate document turn-around for all walk-in customers.

In addition, OnCore's online linking will allow the public instantaneous access to their recorded documents through the system's dynamic interaction to the web. The recording software's web interface enables up-to-the-minute searching and image viewing from home or office. Migrating to the new OnCore System assures that the Erie County Recording office employees and searchers will have the most up-to-date technology designed specifically for the digital realm.

President, Paul Miller comments, "Erie County's in-depth analysis of vendors and selection of Aptitude Solutions places our product suite and services at the top of the market. The professional and courteous employees of the Erie County Recorder's Office will be a pleasure to work with. We look forward to a long relationship of serving Recorder Barbara Sessler and her staff."

The OnCore System revolutionizes traditional recording methods, allowing recorders to automatically index directly from the scanned image by working through a queue system. With the ability to handle high volume recording, OnCore offers immediate turn-around for the customer's documents. The OnCore recording system's scan-first technology allows the County to image all documents coming into the county immediately, creating a digital work environment for book/page stamping, quality checks, indexing, and verification. The initial scan minimizes paper handling in additional areas by enabling employees to instantly scan miscellaneous paper such as cover letters, check payments, and other secure documents accessible by authorized staff.

Aptitude Solutions' policy of providing enhancements packaged in regular updates to all OnCore customers allows counties to benefit constantly from the newest ideas and quality features available.

Erie County, Ohio Recorder Barbara Sessler comments, "After reviewing many products from vendors across the nation, Aptitude proved to be the top selection. Their reputation for customer service was unmatched and their dedication to premier industry technology was apparent throughout their bid, and further supported by their current customers. This software solution will allow the public to better obtain the information they need and will enable our staff to serve the public with greater efficiency."
