

## **Press Release**

### **Gilchrist County, Florida Clerk of Court Live with Automated Redaction**

**Maitland, Florida -- (August 1, 2007) --** Aptitude Solutions, a division of Fortune 500 company Fidelity National Information Services, Inc. (NYSE:FNF) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case management systems, today announced the implementation of aiREDACT automated redaction technology at Gilchrist County, Florida Clerk of Courts office.

Gilchrist County, Florida Clerk of Courts has taken advantage of the aiREDACT technology, which is integrated with the OnCore Recording System to capture redaction candidates as documents are added to the Official Records. OnCore utilizes up-front scan technology that completely digitizes the official record indexing and recording process, thus reducing internal paper flow and expediting the document recording process. This solution enhances automation in the overall recording process, thus increasing the accuracy of locating sensitive information.

Gilchrist has implemented aiREDACT to handle redaction of sensitive information on a go-forward basis. aiREDACT integrates into the OnCore workflow automatically locating redaction candidates which are then placed in a review queue. aiREDACT is compliant with State requirements for the protection of sensitive personal information including but not limited to social security numbers, bank account numbers, credit and debit account numbers, and more.

*Clerk of Court, Joe Gilliam, comments "We contracted with Aptitude to handle our historical records for redaction. Knowing that Aptitude has used aiREDACT to redact over 250 million records for other counties made the decision easy to choose aiREDACT for our go forward needs."*

The need for protecting sensitive publicly available information has become a major concern for many counties across the country. With aiREDACT, Gilchrist County now has the tools necessary to ensure that this information remains protected.

*Vice President, Tim Nemethy, explains, "The fact that Gilchrist County has chosen to move forward with aiREDACT proves that this system is not just for the large counties with voluminous records."*
