

ANNOUNCEMENT

Johnston County, N.C. Register of Deeds Implements Aptitude Solutions' Automated Redaction Software for Protecting Sensitive Information in Public Records
LPS' OnCore Solution Effectively Supports High-Volume Property Recordings and Redaction

JACKSONVILLE, Fla. (January 25, 2010) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has implemented Auto-Redaction (OCR) software in the Johnston County, North Carolina, Register of Deeds Office.

Register of Deeds Craig Olive has completed historical redaction processes for over 30,000 images, safeguarding personal information such as driver's license and Social Security numbers in Johnston County's public records. After several years of working with state senators and appealing to the North Carolina General Assembly, Register of Deeds, Olive saw his vision become a reality with the passing of legislation supporting the redaction of personal information in North Carolina public records. Aptitude Solutions' Auto-Redaction software effectively enables county governments to follow the spirit of the privacy laws by providing the ability to identify and redact a variety of personal information (Social Security numbers, birth dates, driver's license numbers, etc.). Public constituents now have the ability to search for information that needs to be accessible by law, while personal information is kept secure. Auto-Redact uses Optical Character Recognition (OCR) technology to literally read every page of each scanned image, identify all regions that contain sensitive information, and electronically highlight that information on the image for quality assurance and redaction. Auto-Redact also supports multiple redaction environments, meaning that a county can simultaneously process images on go-forward and historical bases.

Mr. Olive announced, "I am thrilled that sensitive personal information is now safeguarded from public viewing. I will continue to strive to protect the public's interest and push for legislation that focuses on redaction efforts in my office, in Johnston County and throughout the state of North Carolina."

Aptitude Solutions' OnCore Recording System is seamlessly integrated with the Auto-Redact software. For the Johnston County, N.C. Register of Deeds' project, Aptitude Solutions will perform turn-key services to process approximately six million images for redaction in the historical library vault. Simultaneously, Aptitude Solutions' redaction software operates in Mr. Olive's office for immediate redaction of current day-forward recorded documents. Full integration with the OnCore system offers an automated method to record, redact and securely manage the public record.

Aptitude Solutions' sole focus on government software technology enables its staff to provide the very best in conversion services, software implementation, project management, and customer service. Aptitude

Solutions' team of experts are trained and experienced and offer an exceptional level of commitment to service that cannot be beat by any competitor in the market today.
