Larimer County, Colorado, Implements Aptitude Solutions Automated Indexing Optical Character Recognition Technology with OnCore

LPS' OnCore[®] Solution Effectively Supports High-Volume Property Recordings

JACKSONVILLE, Fla. (January 25, 2010) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has implemented automated indexing with Optical Character Recognition (OCR) software in Colorado's Larimer County Recording Office, providing a powerful software solution that further automates and streamlines land recording and indexing for the Clerk and Recorder.

"Larimer County strategically implemented Aptitude's Auto-Index OCR Technology in order to improve efficiencies and control costs," said Scott Doyle, Larimer County Clerk and Recorder. "The software immediately captures index data to provide instant retrieval access for the public in OnCore's search."

The Clerk and Recorder's office has taken advantage of the Auto-Indexing technology, which is fully integrated with the OnCore Recording System. OnCore, creates an image-centric workflow environment and further facilitates electronic recording, automatic document queuing, electronic digital stamping, instant public access queries and more. In production since 2006 and serving almost 300,000 property owners in Larimer County, OnCore can enhance and streamline production for Clerk and Recorder offices of all volumes. Larimer County records hundreds of documents each day, including electronic recordings.

Paul Miller, president of LPS' Aptitude Solutions said, "Aptitude designs software systems to further increase efficiency and reduce overhead costs through integrated systems. Larimer County joins many other Aptitude customers nationwide in automating production with OCR technology to better serve its constituents."

OnCore utilizes up-front scan technology that completely digitizes the official record indexing and recording process, thus reducing internal paper flow and expediting the document

recording process. These added solutions enhance automation in the overall recording process, thus increasing accuracy and accessibility of the data.

About LPS Aptitude Solutions

LPS Aptitude Solutions is a division of Lender Processing Services, Inc., a leading provider of integrated mortgage, real estate and government technology and services. LPS Aptitude Solutions is the leading provider of innovative technology solutions for county governments. Our end-to-end suite of software products automates workflow processes and increases efficiency. Software solutions include ShowCase's comprehensive court case management solution, OnCore's land records recording system, Tribute's tax deed filing system, automated indexing and redaction optical character recognition (OCR) tools, Web search engines, and more. Aptitude Solutions is the one source for all county government software automation and efficiency needs.
