

ANNOUNCEMENT

Tipton County, Indiana, Signs with Aptitude Solutions to Implement the OnCore Recording Platform & Automated Redaction System

LPS' OnCore[®] Solution Effectively Supports High-Volume Property Recordings

JACKSONVILLE, Fla. (November 12, 2009) - Lender Processing Services, Inc. (LPS), a leading provider of integrated technology and services to the mortgage industry and government agencies, today announced that its Aptitude Solutions division has contracted for land records recording software in Indiana's Tipton County, providing a powerful software solution that further automates and streamlines land recording and indexing for the County Recorder.

OnCore[®], Aptitude Solutions' industry-leading recording and indexing platform, creates an image-centric workflow environment using a true up-front scan technique. OnCore's scan-first workflow further facilitates electronic recording, automatic document queuing, electronic digital stamping, instant public access queries and more. Currently in production in County Recording offices that serve almost two million property owners, OnCore can enhance and streamline production for Recorder offices of all volumes.

Tipton County is one of more than 60 counties in the country to implement Aptitude Solutions' OnCore platform for electronic land records indexing and eRecording. "We are looking forward to upgrading to a more progressive technology in our Recording office," said Tipton County Recorder Marla Featherstone. "Our staff and the public will benefit greatly from the new enhancements to our workflow and document searching."

Aptitude Solutions' seamlessly integrated auto-redaction software will effectively enable Tipton County to follow the spirit of the privacy laws by providing the ability to identify and redact a variety of personal information such as Social Security numbers, birth dates, driver's license numbers and more. Public constituents will have the ability to search information allowed accessible by law, while keeping personal information secure. Auto-Redact uses Optical Character Recognition (OCR) technology and literally reads every page of each scanned image, identifies all regions that contain sensitive information, and electronically highlights that

information on the image for quality assurance and redaction. Auto-Redact also supports multiple redaction environments, meaning that a county can process images simultaneously on go-forward and historical bases.

Paul Miller, president of LPS' Aptitude Solutions said, "Indiana represents a new state for Aptitude Solutions where we plan to invest ourselves in the market space to further extend our business by serving the needs of Recorder's Offices in Indiana and the Great Lakes area."

About LPS Aptitude Solutions

LPS Aptitude Solutions is a division of Lender Processing Services, Inc., a leading provider of integrated mortgage, real estate and government technology and services. LPS Aptitude Solutions is the leading provider of innovative technology solutions for county governments. Our end-to-end suite of software products automates workflow processes and increases efficiency.
