Tulsa County Oklahoma Goes Live with Aptitude Solutions' OnCore Recording System

Maitland, Florida -- (September 2, 2008) -- Aptitude Solutions, a leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case management systems, today announced the implementation in the Tulsa County, Oklahoma Clerk's office for complete recording software technology and electronic recording.

Tulsa County, Oklahoma is the 1st County in Oklahoma to implement Aptitude Solutions' OnCore recording platform, a system used by county government for electronic land records indexing and eRecording. The system's scan-first technology has digitized the workflow queues and created a paperless workflow environment. With almost 600 flex-settings available in OnCore, the Clerk's office was able to create a system workflow that met their dynamic business needs.

Tulsa County Clerk Earlene Wilson comments, "The implementation team at Aptitude Solutions dedicated themselves to our project in a true partnership fashion. Working side by side with our staff, they ensured our goals were met. We were successfully eRecording on day one of our implementation and the transition to the new system was completely smooth and seamless."

Tulsa represents the second largest County in the state of Oklahoma, with a population of well over 500,000, resulting in an increased need to service the public with more speed and efficiency than ever before. Implementation of Aptitude's OnCore Recording System enables Tulsa County to handle high volume recording, including increased automation and detailed audit checks, improving the staff experience and customer service in the recording office and public search arena.

President, Paul Miller comments, "Tulsa County's technology initiatives and goals for electronic recording have allowed Clerk Earlene Wilson and her staff to take advantage the robust feature set available in the OnCore Recording System. Their accelerated production rate and high volume document recording exhibited at implementation illustrate the success of our partnership on this project."

Tulsa County has also contracted to take advantage of automated redaction and automated indexing OCR (Optical Character Recognition) technologies. aiREDACT and aiINDEX are both seamlessly integrated with the OnCore Recording System. aiREDACT captures redaction candidates as documents are recorded. This solution is designed for the protection of sensitive information within documents, such as redacting social security numbers and personal information from public view. aiINDEX automates the indexing process, thus increasing productivity and accessibility of the data.

Aptitude Solutions is headquartered in Maitland, Florida. For more information about Aptitude Solutions, call 866.278.4765 or visit www.apitudesolutions.com.
