Tulsa County Oklahoma Clerk's Office Signs with Aptitude Solutions for OnCore Recording System

Maitland, Florida -- (April 21, 2008) -- Aptitude Solutions, a division of Fortune 500 company Fidelity National Information Services, Inc. (NYSE:FNF) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case management systems, today announced the contract signing in the Tulsa County, Oklahoma Clerk's office for complete recording software technology, electronic recording, automated indexing and redaction software.

Tulsa County, Oklahoma is the 1st County in Oklahoma to implement Aptitude Solutions' OnCore recording platform, a system used by county government for electronic land records indexing and eRecording.

Tulsa County represents the second largest County in the state of Oklahoma, with a population of over 500,000, resulting in an increased need to service the public with more speed and efficiency than ever before. After an in depth RFP (Request for Proposals) process, Tulsa County selected Aptitude Solutions to provide a software package that would make the County's technology goals attainable. The new system offers the ability to handle high volume recording, including increased automation and detailed audit checks, improving the staff experience and customer service in the recording office and public search arena.

Tulsa County Clerk Earlene Wilson comments, "After reviewing several systems across the nation, Aptitude proved to be the top selection. Their reputation for customer service was unmatched and their dedication to premier industry technology was apparent throughout their bid, and further supported by their current customers. This software solution will allow the public to better obtain the information they need and will enable our staff to serve the public with greater efficiency."

The Tulsa County Clerk's office has also contracted to take advantage of automated redaction and automated indexing OCR (Optical Character Recognition) technologies. aiREDACT and aiINDEX are both seamlessly integrated with the OnCore Recording System. aiREDACT captures redaction candidates as documents are recorded. This solution is designed for the protection of sensitive information within documents, such as redacting social security numbers and personal information from public view. aiINDEX automates the indexing process, thus increasing accuracy and accessibility of the data.

President, Paul Miller comments, "Tulsa County's in-depth analysis of national vendors and selection of Aptitude Solutions places our product suite and services at the top of the market. The professional and courteous employees of Tulsa County Clerk's Office have been a pleasure to work with. We look forward to a long relationship of serving Clerk Earlene Wilson and her staff."
