

# AUTOMATED REDACTION

Securely redact scanned documents to shield privileged information.

Today many county governments operate with information systems rooted in outdated technology and face challenges such as ballooning volumes, the need to meet mandated technology requirements, space limitations and tighter budgets. **Aptitude Solutions** offers an affordable solution for protecting sensitive customer information with our automated redaction technology. **Auto-Redact** software helps county governments meet redaction requirements and increase efficiency by eliminating the labor-intensive manual image review process.

## Keep your customer's proprietary information safe

**Auto-Redact** allows county governments to follow the spirit of the privacy laws by providing the ability to identify and redact a variety of personal information (Social Security numbers, birth dates, driver's license numbers, etc.). Now your public constituents will have the ability to search on the information that needs to be accessible by law, while keeping personal information secure with appropriate viewing level restrictions.

**Aptitude Solutions** has a proven track record of nationwide success in developing partnerships with counties that are actively using or have purchased our county government software solutions. Our goal is to provide the same quality of software in the redaction arena with our **Auto-Redact** software product.

## How Auto-Redact works

The traditional redaction method finds redaction regions by word patterns. **Auto-Redact** literally reads every page of each scanned image, identifies all regions that contain sensitive information, and electronically highlights that information on the image for quality assurance. **Auto-Redact** also supports multiple redaction environments, meaning that a county can simultaneously process images on go-forward and historical bases. **Auto-Redact's** reprocessing feature allows counties to reprocess and redact previously redacted images with new categories of information to conceal. **Auto-Redact's** standard XML interface seamlessly integrates with recording and court systems such as the **OnCore®** and **ShowCase™** systems.

**Auto-Redact** uses multiple methods to identify redaction candidates. Using document content, **Auto-Redact** identifies redaction candidate regions by the structure of the actual text to be redacted. Another method of identifying redaction candidates is to evaluate the document context. **Auto-Redact** can identify redaction candidates by evaluating the surrounding text. **Auto-Redact** also is capable of integrating documents unique to your county and applying these document standards to the redaction software rules using adaptable architecture to incorporate changing requirements.

## Auto-Redact Features

- Meets compliance standards for securing sensitive information
- Adaptable architecture enables counties to customize for unique documents
- Faster and more reliable than redacting documents manually
- Allows for the redaction processing of both official records and court case documents
- Competitive, full-process pricing
- Redaction by content and by context
- On-the-fly redaction for images published to the Internet
- Batch processing redaction allows for historical processing
- Proven technology – installed nationwide
- Full integration with recording and court systems
- Stand-alone processing is also available
- Turnkey processing and software licensing options are both available

## Redaction Services

In addition to offering the most full-featured redaction system available, **Aptitude Solutions** also offers turnkey redaction services. Using the same **Auto-Redact** technology, we'll process your image library at a very competitive price. Through our turnkey solution, we will process your images, identify redaction candidates, review them for confirmation, and return your secure redacted images fully processed.

Whether you choose to use the **Auto-Redact** software to process the images yourself or contract with **Aptitude Solutions** for full redaction processing, rest assured that you're using the best technology available today!

**Call 866.278.4765 today** to increase efficiency and quickly meet redaction requirements!
